

Independent Medical Examination Report

Aldergate Personal Injury · Independent Medical Examination

Claimant

Joseph Thompson · CLAIM-5182

Instruction

To assess the nature and likely duration of the injury, and to comment on capacity for work.

Findings

Restricted cervical and lumbar range of motion, with radicular symptoms in the left leg consistent with the L4/L5 protrusion. Symptoms have persisted beyond the twelve-week horizon assumed by the initial treatment plan.

Opinion

A further period of treatment is indicated. Whether any impairment will be permanent cannot be determined on the current evidence and should be reviewed once the updated records are available.

Demo data. Aldergate Personal Injury is a fictional insurer.
