

Medical Records Bundle

Aldergate Personal Injury · Injury Assessment · MED-2026-08842

Claimant

Joseph Thompson · CLAIM-5182 · Policy ALD-PI-2023-0421

Records received

1 September 2026

Presentation

The claimant was struck from behind at the A38 Chester Road junction and attended the emergency department the same morning. Imaging shows an L4/L5 disc protrusion alongside a whiplash-associated disorder of the cervical spine. Mechanism consistent with a rear-end collision. No indication of a pre-existing degenerative change on the available films.

Certification

The treating consultant certified the claimant unfit for work for an initial twelve weeks. Symptoms have now persisted past that mark and a further review has been requested, so the long-term prognosis is recorded as probable rather than confirmed.

Outstanding

Updated records from the treating consultant. The case is referred to the claims officer pending receipt.

Demo data. Aldergate Personal Injury is a fictional insurer.
